HOME PAGE

1. Introduction

- This is the homepage of Ask-Me Mobile, a website that showcases smart electrical solutions.
- The page is designed using HTML, CSS, JavaScript, and Font Awesome icons.
- It includes multiple sections such as Header, Hero, Product Cards, , Reviews, and Footer.

2. Header Section

- Added a navigation bar using `<header>` and `<nav>` tags.
- The navigation bar includes:
 - Logo of Ask-Me Mobile (text-based with design using spans).
 - Navigation menu with links like *Home*, *Compare*, *About*, *FAQ*, and *Contact*.
 - A dropdown menu under *compare* with categories (Apple, Samsung, One Plus, etc).
- External Font Awesome library linked for icons.

4. Hero Section

- Designed a hero area with a main heading and description paragraph.
- Included a button that allows users to Compare phone and Browse Phone.

5. Features Phone:

- Added a section heading: *"Features Phone OF This Month"*.
- Created image cards for each category:
 - Samsung
 - Apple
 - Ansu
- Each card contains:
 - Product image
 - Title and short description
 - "Compare" button linking to respective product pages.
 - "More Details" button linking to respective product pages.

7. Customer Reviews Section

- Added a slider containing multiple customer review cards.
- Each card includes:
 - Customer image
 - Review text

- Star ratings using Font Awesome icons
- Reviewer name
- Created multiple review examples for different brand products (Apple, Samsung, Oppo, One Plus, etc.) .
- This section highlights customer satisfaction and builds trust.

8. Footer Section

- Divided the footer into four columns:
 1. About Company – Description, contact time, and social media links.
 2. Useful Links – Navigation links like Home, About, Contact.
 3. Categories – Product categories (Apple, Samsung, Google Pixel, One Plus).
 4. Contact Info – Twitter, Youtube, and Facebook.
- Added a copyright line: “© 2025 Ask-Me Mobile.
- Made with ♥ for phone lovers everywhere.

Don't just take our word for it—here's what real users think about AskMeMobile

||

I was torn between the Galaxy S22 and iPhone 14. Used the comparison tool here and it literally showed me everything side-by-side. Ended up getting the S22 and couldn't be happier! The camera is insane.

Sarah Mitchell

||

As someone who's not tech-savvy, I appreciated how they explain everything in plain English. No jargon, just honest reviews. Found the perfect phone for my mom within 10 minutes!

James Rodriguez
Teacher

||

The battery life comparisons are spot-on. I travel a lot and needed something that wouldn't die on me. Got the phone they recommended and it easily lasts me 2 days. Game changer!

Overall Design Purpose

The homepage is designed to:

- Present Ask-me Mobile as a modern and innovative electrical brand.
- Offer easy navigation to all main product categories.
- Create a professional first impression using clean layout, animations, and visuals.
- Encourage users to explore and download the product price list.

Compare: -

1. Introduction

- Each mobile has its own dedicated page.
- These pages provide both visual presentation and detailed information about each product type.
- The layout is designed to maintain a consistent structure and professional appearance across all categories.

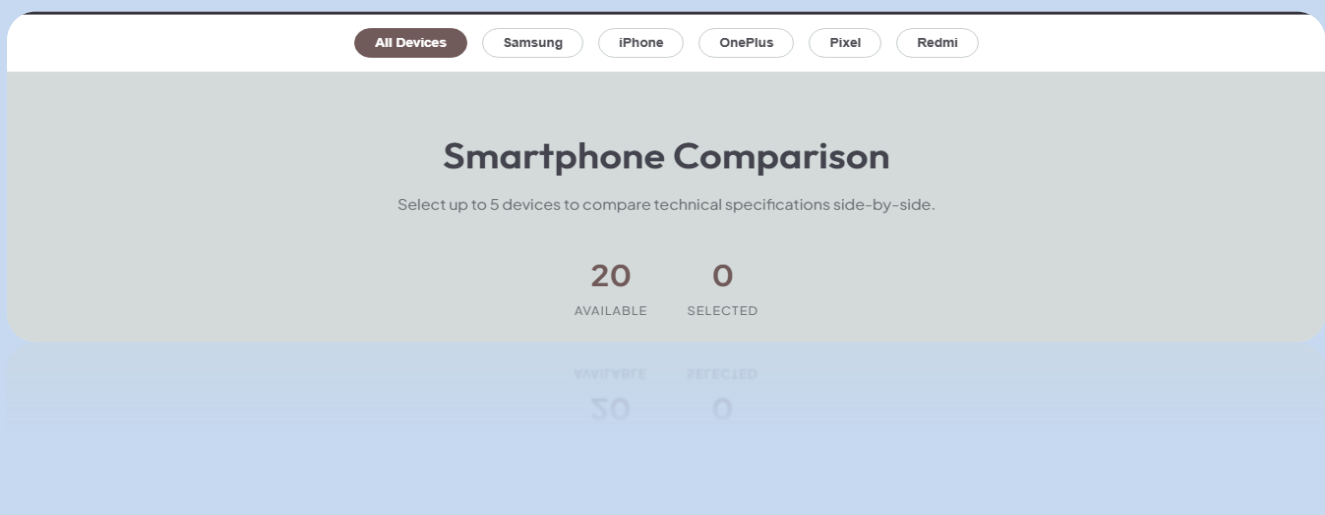

2. Dashboard Interface:

- This is web Phone Comparison Hub.
- Where user can Filter, compare, and review different mobile phones by 5G support, or name.
- The includes a navigation bar, filter dropdowns, reset button, and data in indicator (“Total Phone” and “Selected”).
- Each phone card includes a product image, phone name, a short description, and two action buttons: Compare and More Details.

. Footer

- Same footer used as homepage – includes:
 - Company info
 - Contact details
 - Useful links
 - Social media icons
- Maintains a uniform look and navigation consistency across all pages.

Features:

. Features and Design Highlights

- The layout is user-friendly and visually appealing, showing key products in each category.
- Buttons linking to Word files make it easy for users to access detailed specifications.
- Every section maintains brand consistency through blue-and-white color themes and modern typography.
- The design is responsive, making it viewable on both desktop and mobile devices.

. Purpose of These Pages

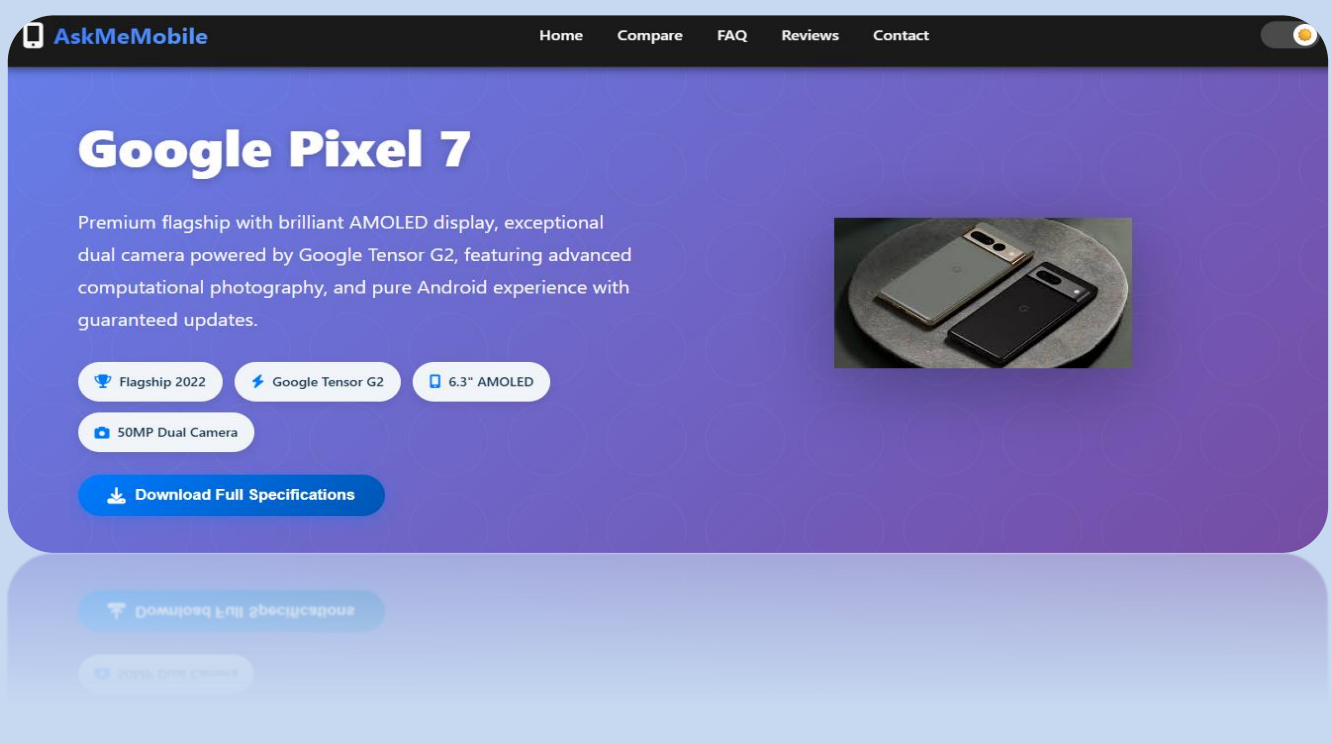

- To provide a dedicated showcase for each major product type offered by Ask-Me Mobile.
- To help customers easily explore product visuals and download detailed information.

- To present Ask-ME Mobile products in a professional and modern layout.
- To maintain consistency and smooth user experience throughout the entire website.

. External Resources Used

- CSS (style/style.css): for layout, borders, and hover effects.
- JavaScript (java/java.js): for interactive elements and buttons.
- Font Awesome: for icons in footer and buttons.
- Word Files (pdf): for downloadable detailed product descriptions.

FAQ:

1. Header Section

- The top of the page features a navigation bar with the **Ask-Me Mobile logo**, menu links (Home, Compare, Reviwe, FAQ, Contact),
- It ensures smooth navigation across all pages of the website.

2. FAQ Introduction Section

- This section begins with a clear title “**Frequently Asked Questions**” and a short description guiding users to find quick answers about Ask-Me Moblie services and products.
- The clean layout and centered text make the page look simple and professional.

3. FAQ Content Section

- Includes a series of **expandable question boxes (Q&A format)** where visitors can click to view answers.
- Questions cover various topics such as product range, delivery services, payment methods, warranty, and customer support.
- The section helps users resolve their queries without needing to contact customer service directly.

4. Footer Section

- The footer contains multiple columns including company introduction, useful links, product categories, and contact details.
- It also features **social media icons**, a contact number, and email address for customer assistance.
- At the bottom, there's a copyright note.

Review:

Customer Reviews

- This section showcases genuine reviews from our customers.
- The feedback reflects real experiences with our services.
- These reviews help build trust and transparency.

User Feedback

- Here you will find feedback shared by users based on their experience.
- These reviews help new visitors understand our service quality.
- We value every piece of feedback we receive.

Customer Experience

- This section highlights the experiences of our customers.
- The reviews provide insight into how our services perform in real use.
- We continuously work to improve the overall experience.

Customer Reviews

Gaming Performance Review

Review 1: The gaming performance is smooth and lag free. High graphics games run without any heating issues. The frame rate stays stable even during long sessions.

Review 2: This phone handles heavy games very well. Touch response is fast and gameplay feels immersive. Battery drain during gaming is also well controlled.

Camera Quality Review

Review 1: The camera captures sharp and detailed photos in daylight. Colors look natural and well balanced. Portrait mode works accurately.

Review 2: Low light photography is impressive for this price range. Night mode improves brightness without losing clarity. Video stabilization is also decent.

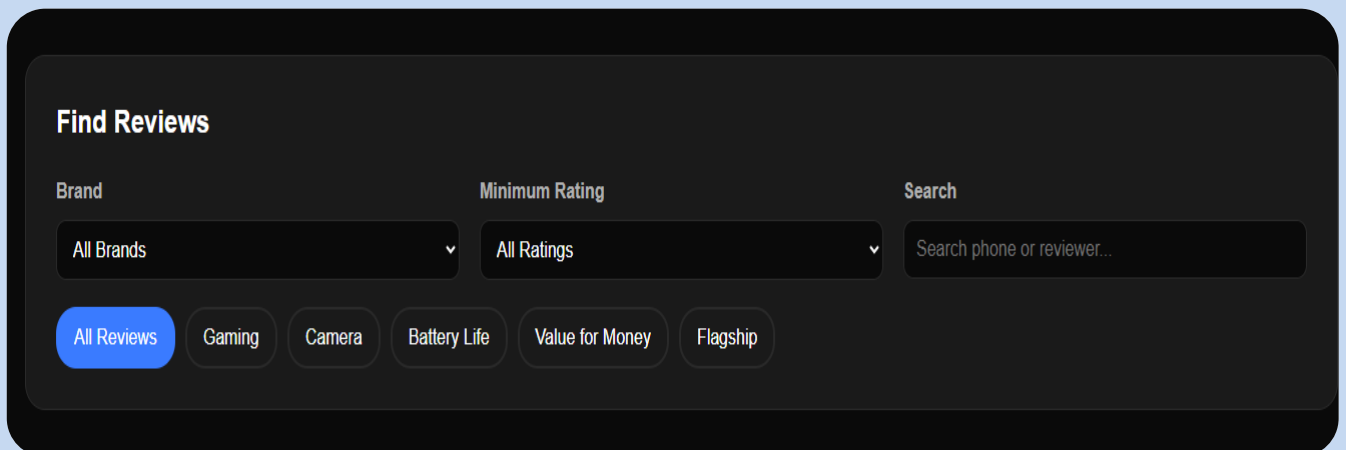

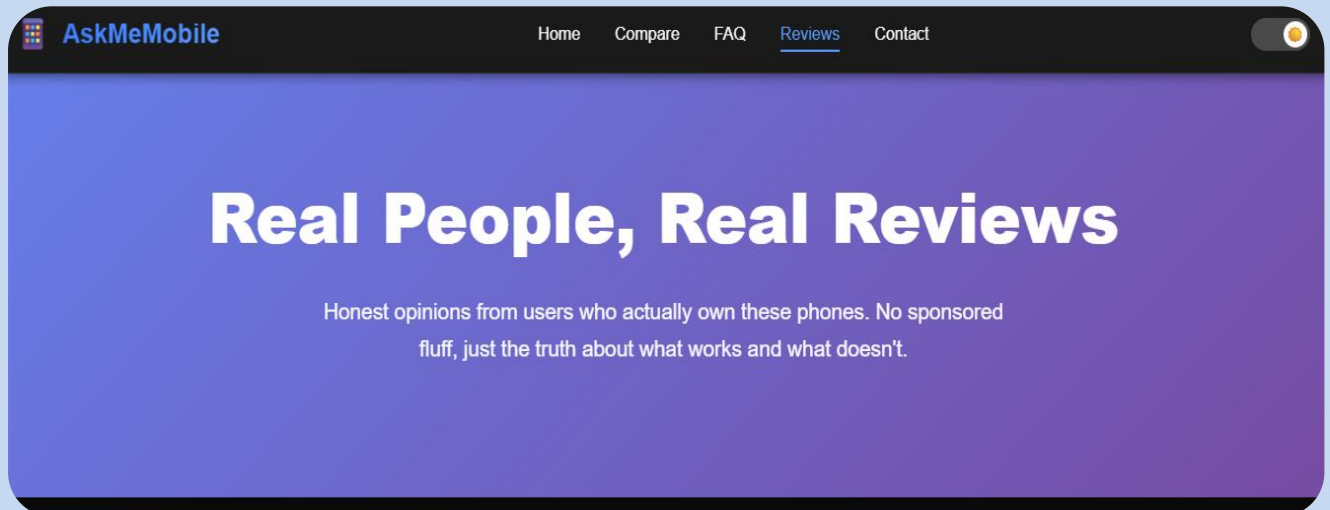

Mobile Features & Performance Review

Review 1: The phone offers excellent overall performance. App loading is fast and multitasking feels smooth. The interface is clean and user friendly.

Review 2: Battery backup easily lasts a full day with regular use. Fast charging support is very useful. The display quality is bright and clear.

Footer Section

The footer includes the **company logo, about information, social media links, and useful navigation links.** It also displays a copyright statement at the bottom and a **Back to Top** button for easy page navigation.

★★★★★ 5.0

Samsung Galaxy S21

Owned for 8 months

A Solid Flagship That Still Holds Up

Look, I'll be straight with you—I almost went for the S22, but after watching countless reviews and comparing specs, I realized the S21 gave me 90% of what the S22 offers for \$200 less. And honestly? I couldn't be happier with that decision.

The 120Hz display is gorgeous. I thought I wouldn't care about refresh rates, but now when I pick up my old phone, it feels like watching a slideshow. Gaming on this thing is smooth as butter, and scrolling through Instagram is just... *chef's kiss*.

Camera-wise, it's not going to beat a Pixel in low-light situations—let's be real. But during the day? Absolutely stunning shots. The 64MP telephoto lens is actually useful, unlike some gimmicky high-MP sensors on cheaper phones.

👍 What I Love

- ✓ Display quality is absolutely top-tier
- ✓ Performance handles everything I throw at it
- ✓ Compact size fits perfectly in my hand
- ✓ Wireless charging is fast
- ✓ Water resistance gave me peace of mind

💡 Could Be Better

- ✗ Battery life is just okay for heavy users
- ✗ No microSD card slot hurts
- ✗ Gets warm during intensive gaming
- ✗ No charger in the box

Bottom Line: If you're looking for a flagship experience without paying flagship prices, this is it. Yes, the battery could be better, but I'm near a charger often enough that it's not a dealbreaker.
