

iPhone 15

The iPhone 15 is Apple's 2023 mainstream iPhone model with a smooth 6.1-inch Super Retina XDR display and a powerful A16 Bionic chip that handles everyday tasks, gaming, and media smoothly. It swapped Apple's old Lightning port for USB-C and added the Dynamic Island interface that used to be exclusive to Pro models. The camera system centres on a 48 MP main sensor and a 12 MP ultrawide lens, delivering strong stills and 4K video.

Features	Details
Model	iPhone 15
Launch Year	Released in September 2023 by Apple.
Display Size	6.1-inch screen, comfortable for one-hand use and media viewing.
Display Type	Super Retina XDR OLED, bright colours and deep blacks for crisp visuals.
Resolution	2556 × 1179 pixels, sharp and clear image quality.
